

INTRODUCING ...

Clarion Eye Care is pleased to offer you convenient, secure access to information from your eye care record through an online **Patient Portal** called **RevolutionPHR**. The acronym PHR stands for “**Personal Health Record**” and represents an online location where you and only you can view important information about your relationship with our office.

RevolutionPHR utilizes the highest standards of online security while allowing you to view portions of your eye care record through any standard Internet browser on a PC or Mac computer (*availability on tablet and mobile devices coming in the near future*).

RevolutionPHR will allow you to review your personal information, view upcoming appointments, check on the status of an order (Glasses or Contacts) and review invoice and accounting information. Future enhancements will eventually allow you to pay your bill and complete your medical history online.

You can decide if access to **RevolutionPHR** is right for you, and participation is completely optional. We have no record of your access and we allow you to use this online Patient Portal at your discretion.

If you are interested in this option, please notify the doctor or a staff member to obtain your Login and Password information.

Steps to Access RevolutionPHR:

1. Access the Internet through your preferred Internet browser on any PC or Mac
2. In the Internet address bar (often called the Toolbar) type our practice address:

www.clarioneyecare.com

***NOTE:** If the page does not load, you will need to install the latest version of Adobe Flash Player – visit www.adobe.com, find the **Download** section for Adobe Flash Player

3. Click on the Tab for **Patient Portal** in the column on the left side of the screen.
4. Click on the hyperlink <https://revolutionphr.com>
5. Insert the Username and Temporary Password assigned to you by our staff.
6. You will be prompted to change your Password at this time.

We are excited about RevolutionPHR and are proud to offer this new feature to our family of patients.
